B. Regulatory changes and consequential amendments to the Scheme

Since the Demerged Company was declared a sick industrial company within the meaning of section 3(1)(o) of the SICA by the BIFR, the said Scheme was required to be filed only with BIFR for its approval. Accordingly, on April 22, 2016, the Demerged Company had filed the said Scheme with BIFR vide its letter dated April 18, 2016 under BIFR Case No.09/2002 ("Case").

As the Scheme was not required to be filed with the High Court or Tribunal for its approval when it was approved by the Board of Directors of both the companies and was required to be filed only with BIFR, the provisions of erstwhile Clause 24(f) of the Listing Agreement and/or regulation 37 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirement) Regulations, 2015 and SEBI circulars No. CIR/CFD/DIL/5/2013 dated February 4, 2013 and CIR/CFD/CMD/16/2015 dated November 30, 2015 (“**SEBI Scheme Circulars**”), in respect of filing of draft scheme of arrangement with the stock exchange(s) / SEBI for obtaining Observation Letter or No-Objection Letter were not applicable to the Resulting Company.

However, subsequently, the Central Government of India, vide Notification No. S.O. 3568 (E) dated November 25, 2016, brought the provisions of SICA Repeal Act into force with effect from December 1, 2016 and SICA was repealed. Section 4(b) of SICA Repeal Act (as amended by section 252 of the Insolvency and Bankruptcy Code, 2016) provides that any proceeding of whatever nature, pending before BIFR shall stand abated. Accordingly, the Scheme filed by the Demerged Company stood abated as on December 1, 2016. With the notification of SICA Repeal Act, the provisions of regulation 37 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirement) Regulations, 2015 and SEBI Scheme Circulars have become applicable to the Resulting Company as the Scheme was then required to be filed with Tribunal.

On March 10, 2017, SEBI vide its Circular No. CFD/DIL3/CIR/2017/21 (“**Revised SEBI Scheme Circular**”), amended the regulatory framework for schemes of arrangements. The provisions of Para 8 of the Revised SEBI Scheme Circular, inter-alia, states that in cases of the issuance of shares under schemes to a select group of shareholders or shareholders of unlisted companies, the issuer shall follow the pricing provisions of Chapter VII of SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2009 (“**SEBI ICDR Regulations**”). Further, as per Para 6 of the said Revised SEBI Scheme Circular, the schemes filed with the stock exchange(s) / SEBI after the date of the Revised SEBI Scheme Circular shall be governed by its provisions.

On September 29, 2017, the Resulting Company had filed the Scheme with the stock exchanges under regulation 37 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirement) Regulations, 2015 with a request for waiver from the requirements of adhering to the pricing provisions of Chapter VII of SEBI ICDR Regulations considering the fact that the Scheme was approved by the Board of Directors of both the companies well before the issue of the said Revised SEBI Scheme Circular. However, the stock exchanges requested the Resulting Company to amend the Scheme and the Valuation Report to meet with the requirements of the Revised SEBI Scheme Circular.

Accordingly, the Board of Directors of the Demerged Company and Resulting Company, in their respective meetings held on November 9, 2017, considered and approved the revised valuation / share entitlement ratio for a demerger of the manufacturing business of Demerged Company into the Resulting Company and made consequential amendment to the Scheme.

C. Approval to the amended Scheme

The Scheme, suitably amended with revised share entitlement ratio for a demerger of the manufacturing business of Demerged Company into the Resulting Company, was placed before the Audit Committees’ of the Demerged Company and Resulting Company at their respective meetings held on November 9, 2017. LLP (hereinafter referred to as “we” or “SRBC” or “us”) wherein Bajaj Electricals Limited (“BEL”) and Hind Lamps Limited (“HLL”) have requested us to recommend a fair entitlement ratio as at 20 November 2015 (“Valuation Date”), based on the balance sheet as at 30 September 2015, of equity shares of BEL to be issued to the shareholders of HLL for the proposed demerger of the manufacturing business of HLL into BEL (“Fair Entitlement Ratio”).

BEL's registered office is at 45/47, Veer Nariman road, Fort, Mumbai – 400 001, Maharashtra, India. Its equity shares are listed on Bombay Stock Exchange ("BSE"), National Stock Exchange ("NSE") and Delhi Stock Exchange.

HLL is engaged in manufacturing of glass bulbs, high intensity discharge (HID) bulbs and aluminum caps. Its manufacturing unit is located at Shikohabad, Uttar Pradesh and Parwanoo, Himachal Pradesh. The manufacturing activity of HLL is hereinafter referred to as 'the Undertaking'. HLL also has a trading unit which is engaged in the business of selling these units to the end consumer. HLL has been declared as a sick industrial company within the meaning of section 3(1)(o) of the Sick Industrial Companies (Special Provisions) Act, 1985 ("SICA") by the Board for Industrial and Financial Reconstruction ("BIFR").

BEL and Undertaking of HLL are hereinafter collectively referred to as "Valuation Subjects".

BEL and HLL are hereinafter collectively referred to as "Companies".

We understand that Managements of the Companies ("Management") are evaluating a demerger of the Undertaking into BEL on a going concern basis under a Scheme of Arrangement under the provisions of Section 18 of the SICA (hereinafter referred to as "the Demerger Scheme" or "Proposed Demerger"). We understand that as consideration, HLL shareholders (except BEL) would be issued equity shares of BEL, in proportion to their shareholding in HLL, for demerging the Undertaking into BEL. The Fair Entitlement Ratio would be determined based on the value of each equity share of BEL and the equity value of the Undertaking per equity share of HLL.

Recommendation of fair entitlement ratio of equity shares of BEL to be issued to the shareholders of HLL for the proposed demerger of manufacturing business of HLL into BEL.

For the aforesaid purpose, BEL and HLL have appointed us to recommend a Fair Entitlement Ratio for distribution of BEL shares to the shareholders of HLL.

The scope of our services is to conduct relative (and not absolute) valuation of equity shares of BEL and the Undertaking of HLL in order to recommend a Fair Entitlement Ratio for the Proposed Demerger.

We have considered financial information of BEL and the Undertaking of HLL upto 30 September 2015 in our valuation and made adjustments for facts made known to us till the date of our report. The Management has informed us that they do not expect any events which are unusual or are not in normal course of business till the demerger is effective. The Management has further informed us that:

- (a) there would not be any substantial capital variation in either of the Companies till the demerger becomes effective without approval of the shareholders other than on account of existing ESOP Schemes in BEL.
- (b) neither Companies would declare any special dividend till the date the shares of BEL are issued under the Demerger Scheme.

We have relied on the above while arriving at the Fair Entitlement Ratio for the Proposed Demerger.

This report is our deliverable in respect of our recommendation of Fair Entitlement Ratio as at 20 November 2015 for the Proposed Demerger of the Undertaking of HLL into BEL.

This report is subject to the scope limitations detailed hereinafter. As such the report is to be read in totality, and not in parts, in conjunction with the relevant documents referred to herein.

Recommendation of fair entitlement ratio of equity shares of BEL to be issued to the shareholders of HLL for the proposed demerger of manufacturing business of HLL into BEL.

APPROACH - BASIS OF DEMERGER

The Proposed Demerger scheme contemplates the demerger of Undertaking into BEL pursuant to the Demerger Scheme under the provisions of Section 18 of the SICA. Arriving at the Fair Entitlement Ratio of equity shares for the Proposed Demerger of the Undertaking into BEL would require determining the relative values of the Undertaking in terms of BEL. These values are to be determined independently but on a relative basis and without considering the effect of the current demerger transaction.

There are several commonly used and accepted methods for valuation of companies/businesses to determine the fair entitlement ratio for a demerger, which have been considered in the present case, to the extent relevant and applicable, including:

- Market Price method
- Comparable Companies' Multiples (CCM) method / Comparable Transactions Multiple (CTM) method
- Discounted Cash Flows method
- Net Asset Value method

It should be understood that the valuation of any company/businesses or its assets is inherently imprecise and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our valuation, we made numerous assumptions with respect to industry performance and general business and economic condition, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market condition, the condition and prospects, financial and otherwise of the companies, and other factors which generally influence the valuation of the companies / businesses and their assets.

The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for transactions of a similar nature and our reasonable judgment, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.

Recommendation of fair entitlement ratio of equity shares of BEL to be issued to the shareholders of HLL for the proposed demerger of manufacturing business of HLL into BEL

Market Price Method

The market price of an equity share as quoted on a stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inbuilt in the value of the shares. But there could be situations where the value of the share as quoted on the stock market would not be regarded as a proper index of the fair value of the share especially where the market values are fluctuating in a volatile capital market. Further, in the case of a demerger, where there is a question of evaluating the shares of one company against those of another, the volume of transactions and the number of shares available for trading on the stock exchange over a reasonable period would have to be of a comparable standard.

In the present case, the shares of BEL are listed on recognized stock exchanges like BSE, NSE and Delhi Stock Exchange and there are regular transactions in its equity shares with adequate volumes on BSE and NSE. In these circumstances, the share price observed on NSE for BEL over a reasonable period have been considered for determining the value of BEL under the market price methodology. The Undertaking is a part of HLL and HLL's shares are not listed on any recognized stock exchange.

Comparable Companies' Multiple (CCM) method / Comparable Transactions Multiple (CTM) method

Under this method, value of the equity shares of a company / business is arrived at by using multiples derived from valuations of comparable companies or comparable transactions, as manifest through stock market valuations of listed companies and the transaction valuation. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

Recommendation of fair entitlement ratio of equity shares of BEL to be issued to the shareholders of HLL for the proposed demerger of manufacturing business of HLL into BEL

In the present case, there are no listed Indian comparable companies having business similar to the Undertaking and since we have considered Market Price Method for valuation of BEL, we have not considered market based multiples method for the purpose of this exercise.

Discounted Cash Flows (DCF) Method

Under the DCF method, the projected free cash flows to the firm are discounted at the weighted average cost of capital. The sum of the discounted value of such free cash flows is the value of the firm.

Using the DCF method involves determining the following:

Estimating future free cash flows:

Free cash flows are the cash flows expected to be generated by the company that are available to all providers of the company's capital – both debt and equity.

Appropriate discount rate to be applied to cash flows i.e. the cost of capital:

This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

The Value arrived above under DCF method is adjusted for the value of loans, cash, non-operating assets/liabilities as deemed appropriate.

Considering that the market price method is the best indicator of the value of a company, we have worked out value of BEL as per the DCF method, by using the business plan provided to us by the BEL Management, only for benchmarking purpose.

We have used the DCF method for our valuation of the Undertaking by using the business plan provided to us by the HLL Management.

Recommendation of fair entitlement ratio of equity shares of BEL to be issued to the shareholders of HLL for the proposed demerger of manufacturing business of HLL into BEL

Net Asset Value (NAV) Methodology

The asset based valuation technique is based on the value of the underlying net assets of the business, either on a book value basis or realizable value basis or replacement cost basis. A Scheme of Arrangement would normally be proceeded with, on the assumption that the demerged business will continue on a going concern basis and an actual realization of the operating assets is not contemplated. In such a going concern scenario the relative earning power is of importance, with the values arrived at on the net asset basis being of limited relevance.

Considering the nature of the business of BEL and the Undertaking, we feel it is appropriate to give no weightage to this method for BEL and lower weightage for the Undertaking for valuation.

Recommendation of Fair Entitlement Ratio for Equity Shares

The fair basis of valuation would have to be determined after taking into consideration all the factors and methodologies mentioned hereinabove. For the purposes of recommending a Fair Entitlement Ratio of equity shares it is necessary to arrive at a single value for the Undertaking and the equity shares of BEL. It is however important to note that in doing so, we are not attempting to arrive at the absolute equity value of the Valuation Subjects but at their relative values to facilitate the determination of a Fair Entitlement Ratio. For this purpose, it is necessary to give appropriate weights to the values arrived at under each methodology.

In the ultimate analysis, valuation will have to be tempered by the exercise of judicious discretion and judgment taking into account all the relevant factors. There will always be several factors, e.g. quality and integrity of the Management, present and prospective competition, yield on comparable securities and market sentiment, etc. which are not evident from the face of the balance sheets but which will strongly influence the worth of a share. This concept is also recognized in judicial decisions.

In light of the above and on a consideration of all the relevant factors and circumstances as discussed and outlined hereinabove, we consider that the Fair Entitlement Ratio of equity shares for the proposed demerger of the Undertaking into BEL should be a ratio of 109 equity shares of BEL of ₹ 2/- each fully paid up for every 1,000 equity shares of HLL of ₹25/- each fully paid up.

Note:

As per Explanation to Regulation 76 of SEBI (ICDR) Regulations, 2009, for the purpose of this regulation, 'stock exchange' means any of the recognised stock exchanges in which the equity shares are listed and in which the highest trading volume in respect of the equity shares of the issuer has been recorded during the preceding twenty six weeks prior to the relevant date. In the present case, since shares of BEL are frequently traded on NSE, the stock exchange relevant for our workings shall be NSE.

Approaches / methods of valuation considered in Valuation Report for recommendation of fair entitlement / allotment ratio of equity shares of Bajaj Electricals Limited to be issued to the shareholders of Hind Lamps Limited

To,

The Board of Directors, Bajaj Electricals Limited 45/47, Veer Nariman Road, Mumbai-400 001	The Board of Directors, Hind Lamps Limited Shikohabad, Firozabad Uttar Pradesh 283141
---	--

1. This is with reference to our report dated 31 October 2017 on recommendation of fair entitlement /allotment ratio of equity shares of Bajaj Electricals Limited ("BEL") to be issued to the shareholders of Hind Lamps Limited ("HLL") for the proposed demerger of manufacturing business of HLL into BEL.

As required by Circular No. LIST/COMP/02/2017-18 dated 29 May 2017 issued by the BSE Limited ("BSE") and Circular No. NSE/CML/2017/12 dated 01 June 2017 issued by the National Stock Exchange of India Limited ("NSE") (hereinafter referred to as "Circulars"), we hereby present the requisite information in the format prescribed along with the approaches / methods of valuation considered in the Valuation Report.

Share Entitlement/Allotment Ratio in compliance with pricing provisions of Chapter VII of SEBI (ICDR) Regulations, 2009

Particulars	BEL		Manufacturing Business of HLL	
	Value per share	Weight (%)	Value per share	Weight (%)
NAV Method Approach / Asset Approach – Note 1	N.A.	-	0.00*	20.00
DCF Method Approach / Income Approach – Note 2	N.A.	-	31.70	80.00
Market Price Method / Market Approach – Note 3	260.90	100.00	N.A.	-
Relative value per share	260.90		25.40	
Share entitlement / allotment ratio (rounded off)				0.097

* Considered Nil, since net asset value is negative and HLL is a limited liability entity.

Conclusion : The fair entitlement/allotment ratio of equity shares for the proposed demerger of the manufacturing business of HLL into BEL, should be a ratio of 97 equity shares of BEL of Rs 2 each fully paid up for every 1000 equity shares of HLL of Rs 25 each fully paid up.

Approaches / methods of valuation considered in Valuation :

Note 1 :

NAV Method Approach / Asset Approach

The asset based valuation technique is based on the value of the underlying net assets of the business, either on a book value basis or realizable value basis or replacement cost basis. A Scheme of Arrangement would normally be proceeded with, on the assumption that the demerged business will continue on a going concern basis and an actual realization of the operating assets is not contemplated.

In such a going concern scenario the relative earning power is of importance, with the values arrived at on the net asset basis being of limited relevance.

Considering the nature of business of BEL and the Manufacturing Undertaking of HLL, we feel it is appropriate to give no weightage to this method for BEL and lower weightage for the Manufacturing Undertaking of HLL for valuation. The NAV of Manufacturing Undertaking of HLL is considered Nil since the net assets value is negative and HLL is a limited liability entity. Further, considering that the market price method is the best indicator of the value of the listed company, market price methodology was used for valuation for BEL (please refer Note 3 below) and NAV Method is not applicable for BEL.

Note 2 :

Discounted Cash Flow (DCF) Method Approach / Income Approach

Under the DCF method, the projected free cash flows to the firm are discounted at the weighted average cost of capital. The sum of the discounted value of such free cash flows is the value of the firm.

Using the DCF method involves determining the following:

Estimating future free cash flows:

Free cash flows are the cash flows expected to be generated by the company that are available to all providers of the company's capital – both debt and equity.

Appropriate discount rate to be applied to cash flows i.e. the cost of capital:

This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

The value arrived above under DCF method is adjusted for the value of loans, cash, non-operating assets/liabilities as deemed appropriate.

In business valuations, it is essential for the valuers to not only take into consideration the past profits of the company, but also look at its future profitability. The DCF method values the business by discounting the free cash flows for the explicit forecast period and the perpetuity value (terminal value) thereafter. The free cash flows represent the cash available for distribution to both, the owners and the creditors of the business. The perpetuity value of the entity is calculated to fully capture the growth capacity of the entity to infinity after the explicit period of projections. It is important for the valuer to consider the past growth rate of the company as well as to consider the future growth rate expected basis the future projections for the explicit period to arrive at the perpetuity growth rate. Thus, considering the multiple factors of inputs required for the calculation of DCF method, the information so required is regarded as price sensitive information, and so not suitable for listed company and hence the market price is regarded as the good barometer of fair value of the equity shares at which an informed buyer and an informed seller are willing to transact in the equity shares of the company.

Therefore, considering that the market price method is the best indicator of the value of the listed company, the value of BEL as per DCF Method is worked out by using the business plan provided by the management of BEL only for benchmarking purposes and the valuation of BEL is considered basis for the market price method (please refer Note 3 below) and hence DCF method for valuation for BEL is not applicable.

The DCF Method for valuation of Manufacturing Business of HLL is based on the business plan provided by the management of HLL

Note 3 :

Market Price Method / Market Approach

The market price of an equity share as quoted on a stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inbuilt in the value of the shares. But there could be situations where the value of the share as quoted on the stock market would not be regarded as a proper index of the fair value of the share especially where the market values are fluctuating in a volatile capital market. Further, in the case of a demerger, where there is a question of evaluating the shares of one company against those of another, the volume of transactions and the number of shares available for trading on the stock exchange over a reasonable period would have to be of a comparable standard.

In the present case, the shares of BEL are listed on the recognized stock exchanges viz BSE and NSE and there are regular transactions in its equity shares with adequate volumes. In these circumstances, the share price observed on NSE for BEL over a reasonable period have been considered for determining the value of BEL under the market price methodology.

The reasonable period is considered in terms and compliance of newly inserted Proviso to Clause 70(1)(b) read with Clause 76 of Chapter VII of the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009 (as amended) ('the ICDR regulations'), if the equity shares of the issuer have been listed on a recognised stock exchange for a period of twenty six weeks or more as on the relevant date, the equity shares shall be allotted at a price not less than **higher** of the following:

- (a) the average of the weekly high and low of the volume weighted average price of the related equity shares quoted on the recognised stock exchange during the twenty six weeks preceding the relevant date; or
- (b) the average of the weekly high and low of the volume weighted average prices of the related equity shares quoted on a recognised stock exchange during the two weeks preceding the relevant date.

The Undertaking is a part of HLL and HLL's shares are not listed on any recognized stock exchange, hence market price method / market approach is not applicable for HLL's valuation

Restriction on Use

The above should be read in conjunction with our Report dated 31 October 2017 and the valuation report issued by S. R. Batliboi & Co. LLP dated 22 November 2015 and is subject to the scope of limitations enunciated in the reports. It should not be used by any other person or for any other purpose. Auditors Responsibility

Our objectives are to obtain reasonable assurance about whether the Interim Ind AS Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. - Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the Interim Ind AS Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the Interim Ind AS Financial Statements, including the disclosure, and whether the Interim Ind AS Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal controls that we identify during our audit.

Borrowings from related party Bajaj Electricals Limited (having significant influence over Hind Lamps Ltd.) with no repayment stipulation as per sanctioned MDRS by BIFR, are treated as "Other Equity" under the head "Others-Other Equity".

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Where there is a breach of a material provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the entity does not classify the liability as current, if the lender agreed, after the reporting period and before the approval of the Financial Statements for issue, not to demand payment as a consequence of the breach.

l) **Provisions**

Provisions for legal claims, service warranties, volume discounts and returns are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognised for future operating losses.

Provisions for restructuring are recognised by the Company when it has developed a detailed formal plan for restructuring and has raised a valid expectation in those affected that the Company will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

The measurement of provision for restructuring includes only direct expenditures arising from the restructuring, which are both necessarily entailed by the restructuring and not associated with the ongoing activities of the company.

m) **Retirement Benefits**

Liabilities in respect of retirement benefits to employees are provided for as follows:

- a) **Defined Benefit Plans** - The Employee's gratuity fund scheme, long term compensated absences, post retirement medical benefit schemes, Central Government Provident Fund Scheme are Company's defined benefit plans.

The present value of the obligation under such defined benefit plans is determined based on the actuarial valuation using the Projected Unit Credit Method which recognizes each period of service as giving rise to the additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation. The obligation is measured at the present value of the estimated future cash flows. The discount rate used for determining the present value of the obligation under defined benefit plans, is based on the market yields on the Government securities as at the Balance Sheet date having maturity periods approximating to the terms of the related obligations.

Actuarial gains and losses are recognized in the Statement of Profit and Loss. In case of funded plans, the fair value of the plan asset is reduced from the gross obligation under the defined benefit plans, to recognize the obligation on the net basis.

Gains or losses on curtailment or settlement of any defined benefit plans are recognized when the curtailment or settlement occurs.

Past service cost is recognized as expenses on straight line basis over the average period until the benefits became vested.

- b) **Defined Contributions Plans** - The Company's approved Superannuation Scheme, Employee State Insurance Scheme and Employee Pension Schemes are defined contribution plans.

The contribution paid/payable under the schemes is recognized during the period in which the employee renders the related service.

The Company makes specified monthly contributions towards employee provident fund to a Trust administered by the Trustees. The minimum interest payable by the Trust to the beneficiaries every year is being notified by the Government. The Company has an obligation to make good short fall, if any, between the return from the investments of the Trust and the notified interest rate.

Re-measurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the Statement of Changes in Equity and in the Balance Sheet.

- n) **Foreign Currency Transactions**

The Functional Currency of the Company is the India Rupee. These Financial Statements are presented in Indian Rupees (to the nearest Paise).

Revenue, expenses and cash flow items denominated in foreign currencies, if any, are translated using the exchange rate in functional currency on the date of the transaction. Transactional gains or losses realized upon settlement of foreign currency transactions are included in determining net profit/(loss) for the period in which the transaction is settled.

- o) **Financial Instruments**

Initial Recognition - The Company recognises financial assets and financial liabilities when it becomes a party to contractual provisions of the instrument. Transaction costs that are directly attributable to the acquisition or issue of financial assets or financial liabilities are added to the same on initial recognition. Regular purchase and sale of financial assets are accounted for at trade date.

Derecognition - The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial assets expires or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial Liability (or a part of Financial Liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expired.

p) **Borrowing Costs**

Borrowing costs are recognised in the Statement of Profit and Loss except in respect of specific borrowing raised for acquisition of capital asset until such time the asset is ready to put to use for its intended purpose, which are added to carrying cost of such asset.

q) **Income Tax and Deferred Tax**

The liability of the Company on account of income tax is estimated considering the provisions of the Income Tax Act, 1961.

Deferred tax is recognized, subject to the consideration of prudence, on timing differences being the difference between taxable income and accounting income that originate in one year and capable of reversal in one or more subsequent years.

r) **Discontinued Operations**

Assets and Liabilities of discontinued operations are assessed at each Balance Sheet date. Impacts of any impairments and write backs are dealt with in the Statement of Profit and Loss. Impacts of discontinued operations are distinguished from the ongoing operations of the Company, so that their impact on the Statement of Profit and Loss for the period can be perceived.

s) **Earnings Per Share**

(i) **Basic earnings per share**

Basic earning per share is calculated by dividing:

- the profit/(loss) attributable to owners of the Company
- by the weighted average number of equity shares outstanding during the financial year, adjusted for bonus elements in equity shares issued during the year and excluding treasury shares.

(ii) **Diluted earnings per share**

Diluted earnings per share adjust the figures used in the determination of basic earnings per share to take into account:

- the after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- the weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

t) **Operating Leases**

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Expenses and income from lease rentals in respect of operating leases are recognized in Statement of Profit and Loss on accrual basis in accordance with the respective lease agreements.

u) Government Grant

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Company will comply with all attached conditions.

Government grants relating to income are deferred and recognised in the Statement of Profit and Loss over the period necessary to match them with the costs that they are intended to compensate and presented within other income.

v) Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit/(loss) before tax is adjusted for the effects of transactions of non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and items of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

The Company continues to pursue cost cutting measures and explore new avenues for business to achieve better contribution and achieve positive net-worth in the near future. The Company is facing difficulty to revive itself and is incurring further losses, the promoters of the Company thought it fit to get its manufacturing business transferred into Bajaj Electricals Limited (BEL). As per the Board of Directors of the Company and BEL, the transfer and vesting of the manufacturing business of the Company with BEL will enable both the companies to achieve and fulfill their objectives more efficiently and economically. A copy of the rehabilitation proposal had been submitted by the Company to the Bench Members, Mon - III, Board for Industrial and Financial Reconstruction, Jawahar Vyapar Bhawan, I, Tolstoy Marg, New Delhi - 110001. As the Scheme was not required to be filed with the High Court or Tribunal for its approval when it was approved by the board of directors of both the companies and was required to be filed only with BIFR, the provisions of Listing Agreement and SEBI circulars, in respect of filing of draft scheme of arrangement with the stock exchange(s) / SEBI for obtaining Observation Letter or No-Objection Letter were not applicable to BEL (being a listed entity).

**Review Report to
The Board of Directors
Bajaj Electricals Limited**

1. We have reviewed the accompanying statement of unaudited standalone financial results of Bajaj Electricals Limited (the 'Company') for the quarter ended September 30, 2018 and year to date from April 1, 2018 to September 30, 2018 (the "Statement") attached herewith, being submitted by the Company pursuant to the requirements of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, read with SEBI Circular No. CIR/CFD/FAC/62/2016 dated July 5, 2016.
2. The preparation of the Statement in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34, (Ind AS) 34 "Interim Financial Reporting" prescribed under Section 133 of the Companies Act, 2013 read with Rule 3 of Companies (Indian Accounting Standards) Rules, 2015, as amended, read with SEBI Circular No. CIR/CFD/FAC/62/2016 dated July 5, 2016 is the responsibility of the Company's management and has been approved by the Board of Directors of the Company. Our responsibility is to express a conclusion on the Statement based on our review.
3. We conducted our review in accordance with the Standard on Review Engagements (SRE) 2410, 'Review of Interim Financial Information Performed by the Independent Auditor of the Entity' issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the Statement is free of material misstatement. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data and thus provides less assurance than an audit. We have not performed an audit and accordingly, we do not express an audit opinion.
4. Based on our review conducted as above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with the recognition and measurement principles laid down in the applicable Indian Accounting Standards ('Ind AS') specified under Section 133 of the Companies Act, 2013, read with relevant rules issued thereunder and other recognised accounting practices and policies has not disclosed the information required to be disclosed in terms of the Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, read with SEBI Circular No. CIR/CFD/FAC/62/2016 dated July 5, 2016, including the manner in which it is to be disclosed, or that it contains any material misstatement.

INTERNAL RISK FACTORS

- a) With the accumulated losses, the net worth of the Demerged Company is negative. Further, the Demerged Company has been declared as a sick industrial company within the meaning of section 3(1)(o) of SICA by BIFR. This exposes the Demerged Company to the risk of bankruptcy and insolvency.
- b) The Auditors of the Demerged Company have included the following “Basis of qualified opinion” in their audit report dated January 2, 2019 on the financial statements of the Demerged Company for the period ended September 30, 2018 :
“Regarding recognition of Deferred Tax Assets, aggregating ₹ 11,64,80,418/- as at September 30th, 2018 (Previous Year ₹ 11,46,52,800/-) in spite of absence of convincing evidence of availability of adequate future taxable profits to demonstrate virtual certainty of reversal of such deferred tax assets, which is not in accordance with the requirements of Ind AS-12, Income Taxes.”
- c) The demand for GLS was severely impacted because of introduction of CFL and LED bulbs having long life. The Demerged Company will need to offer value proposition to its customers to develop business further.
- d) In view of the growth potential in the lighting industry, increased number of players are entering in this segment. Increased competition is likely to put pressure on the existing players. Also, due to competitive nature of the market, pricing pressures persist.
- e) It is a constant challenge to retain the right talent as there is imminent short-term risk from new entrants and existing domestic players.
- f) Non-availability of regular and quality electricity supply is an issue as it may impact overall demand for electrical products.
- g) Clause 17 of the Scheme provides that in the event of any of the sanctions and approvals referred to in this Scheme not being obtained and/or this Scheme not being sanctioned by NCLT or such other appropriate authority and/or order or orders not being passed as aforesaid, or for any other reason, this Scheme cannot be implemented, then the Board of Directors of the Resulting Company and the Demerged Company shall mutually waive/incorporate such conditions as they may consider appropriate to give effect, as far as possible, to this Scheme and failing such mutual agreement, the Scheme shall become null and void, and they shall bear their respective costs, charges and expenses in connection with this Scheme unless otherwise mutually agreed. This exposes the Demerged Company to the risk of bearing costs, charges and expenses in connection with this Scheme.

- h) In past, the Demerged Company has entered into related party transactions.
- i) Some of the Demerged Company's historical, legal and secretarial records are not readily traceable.
- j) The Demerged Company is subject generally to changes in Indian law, as well as to changes in government regulations and policies and accounting principles. Any changes in the regulatory framework could adversely affect the profitability of the Demerged Company or its future financial performance, by requiring a restructuring of its activities, increasing costs or otherwise.
