

# Bajaj Electricals Ltd. IBMS unit bags “Best IBMS Company” Award

Bajaj IBMS today has greatest potential for helping to solve and transform the critical business challenge using technological innovation. The same has been demonstrated in different vertical markets with Projects in Datacentre done on Wireless solutions so that Racks are movable and provide flexible options to datacentre owners and operators.

**B**ajaj Electricals Ltd. is India’s leading consumer durable company with an equally strong presence in the lighting and EPC sectors in the country. Through constant stakeholder engagement and product innovation, we always inspire trust. Bajaj Electricals –IBMS Unit has been awarded “Best IBMS Company” by CIMS Healthcare Excellence Award in July 2015.

Speaking at the occasion, Sr. GM and Head IBMS, Mr. Shakti Leekha said. “The Award encourages Bajaj IBMS to keep doing Customer delight, and getting new technologies, product & solution to market by innovating and creating smarter solutions which are Customer-Centric, Open Technology and Simple.

Bajaj Electricals has entered into an alliance with Delta Controls to offer dependable, open-platform and user friendly building management system (BMS) and energy management systems (EMS) to commercial, health-care, education, leisure buildings along with specialised applications for datacentres with energy management and energy reporting tools for energy efficiency.

The building management systems provided by Delta Controls consists of controllers that operate on Native BACnet (BACnet/IP, BACnet Ethernet, BACnet MS/TP) along with options of controllers with hot swappable modules for easy maintenance and expansion and Power over

Ethernet (POE) controllers which are IT friendly and future ready with wireless and EnOcean products.

The software is designed as a Unified enterprise Platform for Building Automation, Access Control Solution and Lighting Controls with multisite management tools. The software consists of web-based application that combines the power of enterprise dashboards with easy-to-use facility management tools with customizable Energy Management dashboards and powerful energy reports give managers the tools to reduce consumption and drive down costs.

Bajaj IBMS today has greatest potential for helping to solve and transform the critical business challenge using technological innovation. The same has been demonstrated in different vertical markets with Projects in Datacentre done on Wireless solutions so that Racks are movable and provide flexible options to datacentre owners and operators. We have been engaged with close to 100 datacentres in last three years only in India and have demonstrated a clear leadership with multiple tier 3 level Datacentre delivered for full range of solutions on IBMS. We today help business by ensuring Buildings work better and help in expanding the bottom line by delivering energy efficiencies and creating a smarter efficient & productive building. Projects done with Radisson Hotel, Goa and Cosmos Bank Headquarters, Pune, are deriving value in

different business environments Hospitality and Banking by using these systems.

Bajaj Electricals- IBMS now has the products and solutions for Internet of Things (IoT) and the ecosystem of system integrators to move from smart buildings to smart cities and ensuring conservation of energy.

To sustain and gain momentum in bringing this change for smart infrastructure we today have created an eco-system of 30 System Partners who are up-skilled to ensure we develop and maintain the building technologies and solutions. This skilled expert’s pool is growing and by next financial year expect to have 50 system partner organisations working together with Bajaj IBMS to bring this change.
